b A term for the style of architecture prevalent in Western Europe from the twelfth to the sixteenth century, of which the chief characteristic is the pointed arch. Applied also to buildings, architectural details, and ornamentation.

The most usual names for the successive periods of this style in England are *Early English* (or *First Pointed*), *Decorated*, and *Perpendicular*, q v.

Our quotations seem to show that the term was taken in the first instance from the French, and employed to denote any style of building that was not classical (Greek or Roman), but used by many writers as if derived immediately from sense 2

A late L. *gunna* 'skin, fur', is quoted from a scholiast on Verg *Georg.* III. 383, and in Byzantine Gr. γοῦνα is common as the name of a coarse garment, sometimes described as made of skins

The origin of the Rom word is obscure. Some scholars regard it as of Celtic origin, comparing the Welsh *gŵn*, Irish *fŭan* 'lacerna', which are referred by Stokes (Fick's *Idg Wb* [4] II 281) to an OCeltic **vo-ouno-*, f *vo-* (= Gr ὑπό under) + root *ou-* to clothe (cf L *ex-u-ĕre, ind u-ĕre, sub ŭ-cula*) But Loth (*Rev Celt* XX 353) raises phonological objections, and believes the Welsh word to be adopted from Eng (as are the Irish *gŭun*, Gael *gŭn*, Manx *goon*) In any case the Celtic origin of the Rom word does not seem to accord with the geographical probabilities Albanian has *gune* cloak, but it is uncertain whether this is native or adopted from Gr]

9. In University language. a. †Originally, a dispensation, granted by the Congregation of a University or by some Faculty in it, from some of the statutable conditions required for a degree. As in the English universities the full performance of such conditions ceased to be enforced, the 'grace' came to be an essential preliminary to any degree. Hence the word has now the sense· b. The leave of Congregation to take a degree. c. Other decrees of the Governing Body, being very often dispensations from the permanent statutes, were sometimes styled *graces*, and at Cambridge every such decree is called a Grace of the Senate. d. In mod. use, the term is also applied to the permission which a candidate for a degree is required to obtain from his College or Hall.

Græco-, Greco- (grī·ko), mod. combining form of L *Græcus* GREEK Like other comb. forms of ethnic adjs (as ANGLO-, CELTO-, FRANCO-, GALLO-, TURCO-), it is modelled on the form occurring in Greek compounds like Σιρροφοῖνιξ, and in late L imitations of these, like *Gallograecus* Apart from the words *Græcomania*, *Græcophil*, which are formed strictly on Gr. analogies, it occurs only in compound adjs (now always written with hyphen), the sense of which is either 'relating to the Greek settlements or states established in certain regions abroad', as in *Græco-Asiatic*, *-Bactrian*, *-Phrygian*, or 'partly Greek and partly something else', as in *Græco-Latin*, *-Mohammedan*, *-Oriental*, *-Roman*, *-Trojan*, *-Turkish*.

Gram, obs. form of GRAME *sb*; var. GRAME *a*

-gram (græm), repr. (chiefly) Gr. γράμμα something written, letter (of the alphabet). The older Eng sbs with this ending fall into three classes (1) adaptations of actual or assumable Gr. sbs. in -γραμμα, derived from vbs f prep + γράφειν to write, and expressing the result of the action of the verb, as *anagram, diagram, epigram, paragram, program* (usu. in Fr spelling *programme*); (2) compounds of a Gr. sb with γράμμα, f legitimately assumable Gr. types, as *chronogram*, and (later) *ideogram, logogram*; (3) compounds of a numeral with γράμμα, or more frequently with γραμμή line, of which the Gr type, where one exists, is a neut. adj in -γραμμον, as *monogram, hexagram, pentagram.* (Yet a fourth kind of formation has one example in LIPOGRAM.) In the year 1857 the need for a shorter term for 'telegraphic message' was supplied by the introduction of *telegram* (previously proposed in 1852), which violates Gr. analogy, as an adv like τῆλε could not correctly form a compound with a vb. or sb, but which was found so convenient that it quickly became established, and has been adopted into several foreign langs Later formations suggested by this word are the hybrids *cablegram* for 'cable telegram', *pistolgram* for an instantaneous photograph Another recent formation, also suggested by *telegram*, but not open to the same objection, is *phonogram* for the record of sound made by the phonograph. In the denominations of weight in the metric system, *decagram*(*me*, *kilogram*(*me*, etc., *-gram*(*me* is the word GRAM, GRAMME

Grammar (græ məɹ), *sb.* Forms: 4–5 **gram(m)ere**, 4–6 **gramer**, 4–7 **grammer**, (4 **gramaire**, 5 **gramayre**, **-eer**), 6– **grammar.** [ad. OF. *gramaire* (F. *grammaire*), an irregular semi-popular adoption (for the form of which cf. OF. *mire* repr. L. *medicum*, *artimaire* repr. L *artem magicam* or *mathematicam*) of L. *grammatica*, ad. Gr. γραμματική (scil τέχνη art), fem of γραμματικός adj, of or pertaining to letters or literature, f γράμματα letters, literature, pl. of γράμμα letter, written mark, f. root of γράφειν to write. Cf. Pr *gramaira* (prob. from Fr.). Old Fr had also a learned adoption of the L. word, *gramatique*, parallel with Sp *gramática*, Pg, It. *grammatica*, G. *grammatik*, Welsh *gramadeg*

In classical Gr and L the word denoted the methodical study of literature (='philology' in the widest modern sense), including textual and æsthetic criticism, investigation of literary history and antiquities, explanation of allusions, etc., besides the study of the Greek and Latin languages Post classically, *grammatica* came to be restricted to the linguistic portion of this discipline, and eventually to 'grammar' in the mod sense In the Middle Ages, *grammatica* and its Rom forms chiefly meant the knowledge or study of Latin, and were hence often used as synonymous with learning in general, the knowledge peculiar to the learned class As this was popularly supposed to include magic and astrology, the OF *gramaire* was sometimes used as a name for these occult sciences In these applications it still survives in certain corrupt forms, F *grimoire*, Eng GLAMOUR, GRAMARYE]

1 That department of the study of a language which deals with its inflexional forms or other means of indicating the relations of words in the sentence, and with the rules for employing these in accordance with established usage; usually including also the department which deals with the phonetic system of the language and the principles of its representation in writing. Often preceded by an adj designating the language referred to, as in *Latin, English, French* grammar

In early Eng use *grammar* meant only Latin grammar, as Latin was the only language that was taught grammatically In the 16th c there are some traces of a perception that the word might have an extended application to other languages (cf quot 1530 under GRAMMATICAL 1); but it was not before the 17th c that it became so completely a generic term that there was any need to speak explicitly of '*Latin* grammar'. Ben Jonson's book, written *c* 1600, was app the first to treat of 'English grammar' under that name

As above defined, grammar is a body of statements of fact—a 'science', but a large portion of it may be viewed as consisting of rules for practice, and so as forming an 'art' The old-fashioned definition of grammar as 'the art of speaking and writing a language correctly' is from the modern point of view in one respect too narrow, because it applies only to a portion of this branch of study, in another respect it is too wide, and was so even from the older point of view, because many questions of 'correctness' in language were recognized as outside the province of grammar e g. the use of a word in a wrong sense, or a bad pronunciation or spelling, would not have been called a *grammatical* mistake At the same time, it was and is customary, on grounds of convenience, for books professedly treating of grammar to include more or less information on points not strictly belonging to the subject

Until a not very distant date, Grammar was divided by Eng writers (following the precedent of Latin grammarians) into Orthography, Etymology, Syntax, and Prosody, to which Orthoepy was added by some authors All these terms (except Syntax) were used more or less inaccurately (see the several words) The division now usual is that into Phonology, treating of the sounds used in the language, Accidence, of the inflexional forms or equivalent combinations, and Syntax, of the structure of sentences, the branch of grammar dealing with the functions of the alphabetic letters is usually treated along with the phonology.

4. The phenomena which form the subject-matter of grammar, the system of inflexions and syntactical usages characteristic of a language.

Languages not possessing an elaborate system of inflexions and concords are often said to have 'little' or 'no grammar.' This seems to have been partly the meaning of the reproach against the English language quoted by Sidney *Apol Poetrie* (Arb) 70, 'that it wanteth Grammer', though it may also have meant that English had not been refined and improved, as the classic tongues were supposed to have been, by the labours of grammarians

Graph (graf), *sb*.1 [Orig an abbreviation of *graphic formula*. see GRAPHIC]

1 A kind of symbolic diagram (used in *Chemistry, Mathematics*, etc.) in which a system of connexions is expressed by spots or circles, some pairs of which are colligated by one or more lines. Also, *occas*. the system expressed by one of these diagrams

'Graphs' were first employed (under the name of 'graphic formulæ' see GRAPHIC *a* 5) in Chemistry for expressing the relations of the elements forming a compound The application to Mathematics (app also the shortened name) is due to Sylvester.

1878 SYLVESTER in *Amer Jrnl Math* I. 65 The graph to nitric anhydride *Ibid*. 79 Chemical graphs. are to be regarded as mere translations into geometrical forms of trains of priorities and sequences having their proper habitat in the sphere of order. *Ibid*. 126 *note*, Whilst I was only able, in certain cases, to represent in terms of the roots of the parent quantic, the quantitative constitution of a form pictured by a graph he [Clifford] has found the universal pass key to the quantification of graphs. 1879 *Proc Lond Math Soc* XI 2 On Clifford's Graphs Dr Spottiswoode 1884 *Amer Jrnl. -graph (graf), repr. F. *-graphe*, L. *-graphus*, Gr. *-γραφος*. The Greek termination was used to form adjectives, sometimes in the passive sense of 'written', e. g. *αὐτόγραφος* written with one's own hand, *χειρόγραφος* written with the hand; sometimes in the active sense, 'that writes, delineates, or describes', chiefly used *absol* as sbs., 'one who writes, delineates, or describes' · e.g *ζωγράφος* a painter from life, *βιβλιογράφος* a writer of books, *γεωγράφος* a delineator of the earth, a geographer. Many of the passive formations in *-γραφος* have been anglicized, being for the most part used both as adjs. and sbs., as in *autograph, chirograph, holograph*. These words have been imitated in a few modern sbs. formed on Gr. types, as *lithograph, photograph*, and these in turn have been imitated in hybrid formations, such as *pictograph*, jocular nonce-words, like *hurrygraph* for 'a hurried sketch', are occasionally met with. The Gr. active formations in *-γράφος*, where they have been anglicized, take in mod.Eng the ending -GRAPHER, which is used also for new formations denoting persons (exceptions, such as *calligraph*, are rare). The great bulk of the words in *-graph* is composed of technical terms of very recent invention, mostly formed on Gr. elements, and expressing the general sense of 'that which writes, portrays, or records', as *actinograph, heliograph, hygrograph, ideograph, phonograph, seismograph, telegraph*, etc.

-grapher (grăfəɹ), an ending of many Eng. words of Greek derivation. First found in the earlier half of the 16th c The analogy of *astronom-er* (really f *astronomy*, but having the appearance of being f. L *astronom-us* + -ER 1) naturally suggested the use of the suffix *-er* as a means of anglicizing L. words in *-o·graphus* without altering their rhythm, as in *cosmographer* (recorded 1527) In the 16th c there also occur a few derivatives in *-er* from nouns in *-graphy*, as *geographier* (1542), *chronographier* (1548), but these were soon superseded by the forms in *-grapher*. (In CHIROGRAPHER, q.v., the ending has a different source) From the latter part of the 16th c. the formation with *-grapher* has been the normal mode both of anglicizing a real or assumed Gr word in *-γράφος* (see -GRAPH) denoting a personal agent, and of providing a personal designation correlative to sb. in -GRAPHY denoting an art or science It would often be impossible to determine in which of these two ways an individual word actually originated; but the question is unimportant, because Gr. words in *-γράφος* were themselves influenced in sense by their derivatives in *-γραφία*, so that, e g. *γεωγράφος* meant not so much 'one who describes the earth' as 'one versed in *γεωγραφία*'.

The suffix *-ist* has sometimes been used instead of *-er* in anglicizing Gr words in *-γράφος* or forming derivatives from sbs in *-graphy*, cf *biographist* for the more usual *biographer*, *telegraphist* is more common than *telegrapher*.

-graphic (græ fik), the ending of the adjs. correlative in sense with the sbs in -GRAPH, -GRAPHER, -GRAPHY, represents Gr. *-γραφικός*, which occurs in a few words derived from adjs. or sbs. in *-γράφος* (see -GRAPH), some of which have been anglicized, as *ἱστοριογραφικός historiographic*. Any of the Eng. adjs in *-graphic* might conceivably have been formed on an assumed Gr. type, but it is probable that they have been mostly formed with suffix -IC directly on Eng. sbs. in *-graphy* (or less frequently *-graph*). The prevailing sense is 'of or pertaining to —graphy'.

-graphy (grăfi), = F., G *-graphie*, Sp. *-grafia*, It *-grafia*, L. *-graphia*, repr Gr. *-γραφία* in sbs. adapted from Gr or formed on Gr types. The Gr. sbs. in *-γραφία* are abstract nouns of action or function derived from the sbs (or adjs) in *-γράφος* (see -GRAPH, -GRAPHER). Many of these have been adapted in Eng. (usually through the medium of other langs), and many other compounds of Gr. elements on the analogy of them have been formed in Eng., or adapted from Fr. or mod Lat. Some of the words with this ending denote processes or styles of writing, drawing, or graphic representation, as *brachygraphy, calligraphy, stenography, cryptography, lithography, photography*. More commonly they are names of descriptive sciences, as *geography, bibliography* (cf. the Gr. *βιβλιογραφία*, which means the writing of books), *astrography, cometography, petrography, selenography*, etc. Hybrid formations with this ending are rare, *stratigraphy* being almost the only example that has obtained general currency. b. One of the non-cereal *Graminеæ*, or any species of other orders resembling these in general appearance. Often preceded by a defining word, with which it forms the designation of some particular species; as *blue-*, *bunch-*, *dog-*, *St. John's*, *saw-*, *silk-*, *spear-* (etc.) *grass*, for which see those words *Grass of the Andes*, an oat-grass, *Arrhenatherum avenaceum*. *Grass of Parnassus* (also *Parnassus grass*): a name for *Parnassia palustris*.

Turner speaks of the 'right' or 'true' grass, intending to indicate one particular species of plant as properly entitled to the name, but his notions seem to have been vague He regarded the 'true' grass as identical with 'great grass'.

II. In physical senses.

4. † **a.** The quality of having weight, ponderability; the tendency to downward motion, regarded in ancient physics as a property inherent in certain bodies (opposed to *levity*, or the upward tendency ascribed, e g., to the element of fire). *Obs*

c. Specific gravity The degree of relative heaviness characteristic of any kind or portion of matter; commonly expressed by the ratio of the weight of a given volume to that of an equal volume of some substance taken as a standard (viz usually water for liquids and solids, and air for gases) Abbreviated *sp gr*

Since the weights of bodies are proportional to their masses, then specific gravities are in the same ratio as their densities, and in some scientific books the term *density* has displaced *specific gravity*

1666 Boyle in *Phil Trans* I No 14 234 In case its (specifick) gravity were considerably alter'd 1685 *Phil Trans* XV 1004 As if they were different fluids, of different specifick gravities (as the word is now a-days) or (as it was wont to be called, and I think, better) Intensive gravity, one from the other 1696 Whiston *Theory Earth* I (1722) 61 Fluids are as capable of all degrees of Density and specifick Gravity, as Solids 1758 Reid tr. *Macquer's Chym* I. 234 As the fire carries off the most aqueous part, the other which remains in the retort increases in specific gravity 1822 Imison *Sci & Art* I 120 The Hydrometer is the most eligible instrument for finding the specific gravity of fluids 1831 Lardner *Hydrost* VIII 135 By the weights of equal bulks bodies may be separated and arranged in species. fig 1841–4 Emerson *Ess, Spir Laws* Wks (Bohn) I 66 The permanence of all books is fixed by their own specific gravity, or the intrinsic importance of their contents

d. *Specific gravity beads* or *bulbs*: small hollow glass spheres used in determining the specific gravity of a liquid (see quot. 1884). *Specific gravity bottle* or *flask*: an instrument for determining the specific gravity of a liquid by a comparison of the weight of a given volume of it with that of an equal volume of a standard liquid under the same conditions of temperature and pressure; a pycnometer

1863 Atkinson *Ganot's Physics* § 99 Specific gravity flask 1881 *Ibid.* (ed 10) § 122 The pyknometer or specific gravity bottle. 1884 A. Daniell *Princ Physics* 198 Specific-gravity bulbs Bulbs are sold which are known to float without rising or sinking in liquids of the sp gr. marked in numbers upon them A number of them are thrown into the liquid, those which bear too high a number sink, those which are too light rise, the one exactly corresponding, if there be one, is at rest anywhere in the fluid

5. The attractive force by which all bodies tend to move towards the centre of the earth; the degree of intensity with which a body in any given position is affected by this force, measured by the amount of acceleration produced. Also often in wider sense, the degree of intensity with which one body is affected by the attraction of gravitation exercised by another body.

Some writers who restrict the word to terrestrial attraction apply it to the resultant of the earth's attraction of gravitation and the centrifugal force due to the earth's rotation, while others apply it to the gravitational component only

The receipts quoted under sense 1 below are substantially identical with receipts in OF. cookery books, in which the word is *grané* For the OF word the reading *grané* seems certain (though in printed texts *gravé* usually appears); it is prob. cogn. with OF. *gram* 'anything used in cooking' (Godef), and with Grenade[2], Grenadine, cf. also *faus grenon* = 'gravy bastard'. But in the Eng. MSS the word has nearly always either a *v* or a letter which looks more like *u* than *n* (the only exception being in the 'table' to *Liber Cocorum*, which has thrice *grane*, while the text has *grane*) As the ME word was therefore identical in form with the mod word, it seems difficult, in spite of the difference in sense, to regard them as unconnected In the present state of the evidence, the most probable conclusion is that the OF *grané* was early misread as *gravé*, and in that form became current as a term of English cookery]

(See also GREATER, GREATEST.) [Com. WGer.: OE. *gréat* = OFris *grêt*, OS. *grôt* (MDu., Du. *groot*), OHG., MHG. *grôz* (G. *gross*) —OTeut. **grauto-* :—pre-Teut. **ghroudo-* (Wanting in Gothic and Scandinavian.)

On the assumption that the primary sense is 'coarse' (sense 1 below), some scholars regard the word as cognate with ON *grautr* porridge, OE *grút* fine meal, *grot* particle, *grytta* coarse meal, *grótr* sand, gravel, ON *griót* stones. But the connexion is not free from difficulty, as the cognates of these words outside Teut. point to a root meaning 'to pound', a sense from which that of the adj. is not easily derived. It has been suggested (Stokes in Fick *Idg. Wb.*⁴ II. 119) that a cognate of the Teut. adj. may exist in the OIrish *gruad* (? —pre-Celtic **ghroudes-*) cheek (? lit. 'thick or fleshy part' of the face; cf. sense 2 below, and the contrasted notion in OE. *þunwang* lit. 'thin cheek', the temples). The prevailing senses in OE. are 'coarse, thick, stout, big'; but the word also appears as an intensive synonym of *micel* MICKLE, which in the later language it superseded. In OHG. *grôz* had the senses of 'big, awkwardly large', and of 'pregnant', but was also used as a synonym of *mihhil* (though not with reference to length); in OS. *grôt* is recorded only in the sense of 'great', in which it is less frequent (and possibly more emphatic) than *mikil*. The development by which *great* has superseded *muckle* (not only in Eng. but also in Du., Ger., and Fris.) may be illustrated by reference to the mod. colloquial substitution of *big* for *great*, and to the supersession of L. *magnus* in Rom. by *grandis* big, full-grown (see GRAND *a*.)

In this word, as in *break*, the influence of the preceding *r* has caused ME. *ē* to be represented by (ēɪ) instead of the usual (ɪ), cf. *broad* with *ē* instead of *ōᵘ*. The pronunciation (grit) was, however, very common, and approved by the majority of orthoepists, throughout the 18th c., it seems to have been merely an artificial fashion. Many modern dialects have (gɪet), and others have metathetic forms such as (gɔrt), a common Sc. form, esp. in senses 1 and 2, is *gryte* (grɛɪt).]

II. Having a high position in a scale of measurement or quantitative estimation. (Opposed to *small*, *little*.)

With words like *as*, *so*, *how*, the adj., like some other adjs. and advs. of cognate meaning (cf. FAR *adv.* 6), admits of being used in a weakened sense, expressing size or quantity in the abstract. Thus 'as great as' may mean merely 'equal in size or amount to', without any implication that the things compared are 'great'. See also GREATER.

6. Of material objects, with reference to size.

In unemotional use the word in this application is now superseded by *large* or (colloquially) *big*. To use *great* with reference to size now implies either some kind of feeling on the speaker's part, or a mixture of some other sense of the adj. Thus 'I found a *large* table in my room' would simply state a fact, but if *great* were used the sentence would indicate annoyance, amusement, or surprise. Often preceding a partly synonymous adj., as in *great big*, *great thick*, etc. The adj. has never had, like the F. *grand* and the G. *gross*, the sense of 'tall'; if used with reference to stature it expresses some feeling such as surprise, contempt, or admiration, as in 'that great boy', 'a great tall man'.

The substitution of *k* for *g* is commonly accounted for by the supposition that the Teut initial *g*, when the word was adopted, still retained its original pronunciation (γ), so that *k* would be the Teut sound nearest to the Latin *g*. In all the Teut. langs the word was ultimately refashioned after Latin, with change of *k* into *g*; hence OE. *Grécas* pl beside *Crécas*, MDu *Grieke* (Du. *Griek*), mod Ger *Grieche*, ON *Grikkr* pl. Green man, greenman.

†1 A man dressed up with greenery to represent a wild man of the woods, who took part in outdoor shows, masques, triumphs, and the like; a Jack-in-the-green. *Obs.*

The common tavern sign of 'The Green Man and Still' seems to have been suggested by the arms of the Distillers' Company, the supporters of which are two Indians The sign-painters represented the Indian by a 'Green man' (in the above sense), and this figure was afterwards replaced by that of a man clothed in green, a forester, often Robin Hood (See 'Larwood' & Hotten *Signboards* 148)

The primary sense is uncertain, the senses of early occurrence in continental Teut are 'to approach', 'to call upon', 'to provoke or compel to action', 'to attack', 'to irritate, annoy', 'to address, salute'. In mod Ger and Du as in Eng the sense 'salute' has become the prominent one, such other senses as survive being now apprehended as transferred from this (The sb, which may be only a back-formation, expresses the action of the vb in all senses.) The ultimate etymology is equally uncertain with the radical meaning, many scholars refer the word to OAryan **ghrōd- ghrēd-* to resound (see Greet *v.*[2]), on which supposition the primary sense should be 'to call on', another view is that the Teut root **grōt-* is an extension of the root which appears in Gr as χρᾱ́ with the sense 'to approach closely, touch', etc.]

[OE. *grǽg* = OFris. *grê*, MDu. *gra(u)*, *gra* (Du *grauw*), OHG. *grâo*, pl *grâwe* (MHG *grâo*, mod.G. *grau*), ON *grá-r* (Sw. *grå*, Da *graa*), repr. two OTeut types **grǽgo-* and **grǽwo-*:—pre-Teut. **ghrēgwho-* (or **ghrēgh-wo-*, the suffix *-wo-* being frequent in colour-adjs), with variable accent Outside Teut. no affinities have been found; the word has no connexion with OHG *grîs* (Ger *greis*), whence F *gris*.

Each of the current spellings has some analogical support. The only mod Eng words repr OE words ending in *-ǽg* are *key* (which is irrelevant on account of its pronunciation), *whey*, and *clay* If we further take into consideration the words repr OE. words in *-ǽge*, viz *blay* or *bley*, *fey*, *wey*, we have three (or four) instances of *ey* and only two (or one) of *ay* On the other hand, this advantage in favour of *grey* is counterbalanced by the facts that *clay* is the only word of the five which is in very general use, and that *grey* is phonetically ambiguous, while *gray* is not With regard to the question of usage, an inquiry by Dr Murray in Nov 1893 elicited a large number of replies, from which it appeared that in Great Britain the form *grey* is the more frequent in use, notwithstanding the authority of Johnson and later Eng lexicographers, who have all given the preference to *gray* In answer to questions as to their practice, the printers of *The Times* stated that they always used the form *gray*, Messrs. Spottiswoode and Messrs. Clowes always used *grey*, other eminent printing firms had no fixed rule Many correspondents said that they used the two forms with a difference of meaning or application, the distinction most generally recognized being that *grey* denotes a more delicate or a lighter tint than *gray* Others considered the difference to be that *gray* is a 'warmer' colour, or that it has a mixture of red or brown (cf also the quot. under 1 c below). There seems to be nearly absolute unanimity as to the spelling of 'The Scots *Greys*', 'a pair of *greys*' As the word is both etymologically and phonetically one, it is undesirable to treat its graphic forms as differing in signification]
